DETAILED ACTION

Claims 1-17, 19, 21-22, 24-41 are pending.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, 19, 24, 26-37, drawn to nucleic acid, vector, host cell, and first method of using the nucleic acid to make a polypeptide, classified in class 514, subclass 44.
 - II. Claims 21-22 and 25, drawn to isolated polypeptide, classified in class 530, subclass 350.
 - III. Claims 38-41, drawn to a method of making an immunogenic composition, classified in class 935, subclass 60.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product, wherein the product can be used in method of detecting a pathogen (*Clostridium*), in methods of expressing recombinant heterologous antigens, as well as in a method of formulating an immunogenic composition.

Art Unit: 1645

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, the claimed polypeptide or protein has different biological structures, functions and effects, resulting in different modes of operation from that of the claimed nucleic acid. The protein or polypeptide can also be purified from natural sources and need not be produced by recombinant means.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1645

General Observations

7. The Instant Specification does not have an abstract.
8. The Instant Specification is now in sequence compliance.
9. The certified copy of Applicant's Foreign priority document has been received.
10. The IDS submitted August 01, 2000 have been received and matched with the case.
